BIO

An emerging fine art photographer, Bryan Sabol is a technical communicator by trade, a marine biologist through academics, and a lifelong devotee of creative photography. Since turning professional in late 2022, his work has been exhibited in galleries throughout the United States, including Washington, Oregon, Colorado, Missouri, and Ohio.

In his artwork, he combines emotive landscape photography with fanciful textual descriptions. This synergy of image and word encourages viewers to consider deeper layers of meaning by stimulating our most powerful sense: the imagination. Ultimately, his work presents the magic and mystery that we long to find in the world. His intent is to re-ignite our ancient bond with nature that has long lain dormant inside us and ignite the sense of wonder that it can offer.

Bryan lives on a cliff overlooking Puget Sound in Washington state, USA, where artistic inspiration is as close as his back yard.
